### PROFILE

Motivated and detail-oriented BCA graduate with strong interest in software and web development. Completed internship and freelancing experience at Quantum Technology, Gandhinagar, with hands-on exposure to frontend and backend development. Skilled in building responsive and user-friendly applications with a good understanding of modern technologies and problem-solving approaches. Quick learner with strong communication skills, teamwork abilities, and passion for learning new technologies and creating innovative digital solutions.

### WORK EXPERIENCE & PROJECTS

#### Python Developer Intern | Quantum Technology, Gandhinagar

Completed internship and freelancing work at Quantum Technology, Gandhinagar, where worked on real-time website and software development projects. Gained hands-on experience in API integration, database management, backend functionality, debugging, and project optimization. Contributed to multiple development-based projects including AQI Calculator, Map Clustering System, and other software solutions while collaborating with team members in a professional development environment.

#### Projects

##### 1) Clothing E-Commerce Website

Developed a modern and fully responsive clothing e-commerce website using HTML, CSS, JavaScript, Django, and database integration.

- Designed responsive frontend layouts and modern UI components for better user experience
- Developed backend functionality using Django for smooth website operations
- Implemented cart system, product sections, and dynamic website features
- Managed database connectivity and product data handling
- Worked on website responsiveness, performance optimization, and interactive design elements

##### 2) Restaurant Landing Page with Booking Feature

Designed and developed a professional restaurant landing page with complete booking functionality using Django, HTML, CSS, JavaScript, and database integration.

- Created attractive and responsive frontend design for multiple screen sizes
- Developed backend booking functionality and database connectivity using Django
- Implemented dynamic booking features and user-friendly interface elements
- Managed customer booking data and website form handling
- Focused on smooth navigation, responsive layouts, and overall user experience enhancement
